Dear Dr Struthers,

I would appreciate a copy of your paper "Simple Physical Models for Earthquakes..." given at MathFest.

I am particularly interested because the journal that I edit features a department entitled Model Reality Check, which compares a mathematical model to the original real-world context. Your paper might be well-suited to that venue.

Details about *The UMAP* (Undergraduate Mathematics Applications Project) *Journal* (now in its 45th year) are in the links below.

Thank you,

Paul Campbell
